

CARSON SCREENS
ALWAYS A PREMIER

Selina

FIXED FRAME SCREEN

The Selina and Selina-Pro Fixed Frame Projection Screens offer a perfect flat surface for professional image reproduction and clarity. The Selina frame boasts a 90mm width frame, while the flagship Selina-Pro is 120mm wide. Every frame is covered using black velour, thereby eliminating and absorbing any projection over scan. The Selina and Selina-Pro are available in the following screen material types: Matte white, Preference matte white, and Carson Acoustic.

EYE-CATCHING...

Carson Screens reproduce extremely sharp and high contrast images, even in places with high levels of ambient light. Carson Fixed Screens all incorporate velour covered aluminum frames. The projection screen fabric is mounted to the frame in a unique way. This feature produces a guaranteed long term flat projection screen surface. Tensioned screens are often used in locations where permanent installation is desired, such as executive offices, exhibitions and Home Cinema applications.

Selina Pro

FIXED FRAME SCREEN

The Selina Pro Australia's most prominent and largest width Fixed Frame Projection Screen-120mm in surface compared with Australia's average of 70mm* This bold frame design offers strong control over material tension and surface stability. The Selina-Pro demands attention due to its sleek lines and striking presence. Covered in velour and built standard with Carson's signature matte white material.

The Selina and Selina Pro Fixed Frame Screens:

- Australia's most prominent fixed frame screen, 90mm /120mm in width.
- Tension is created using 30 strategic anchor points
- Black Velour covering is standard with Selina
- 5 material types available
- Carson cover - 3 years Warranty*

The Carson Screens logo, featuring a stylized yellow 'S' inside a white circle, with the text 'CARSON SCREENS' in yellow and 'ALWAYS A PREMIER' in white below it.

Cellio

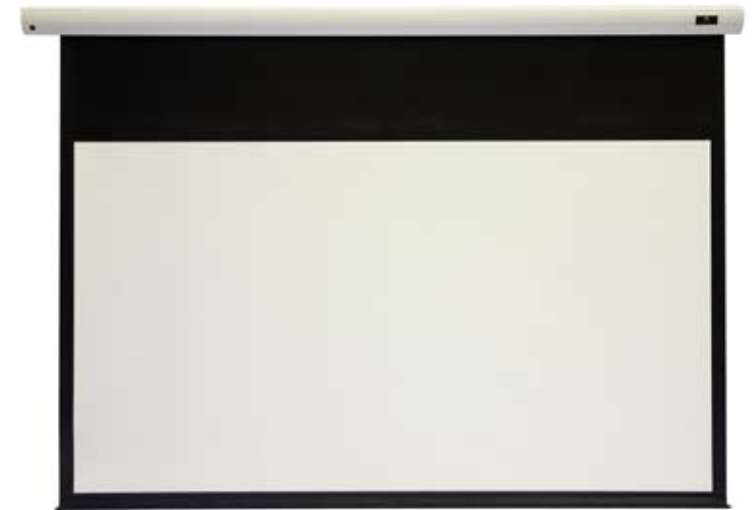

POWERED PROJECTION SCREEN

At the heart of the Cellio Powered Projection Screen is an ANA Italian motor. Famous for quality and precision operation, the Cellio Powered Projection Screen is stylish and professional. In a modern home or cinema, or an executive boardroom, the Cellio's precise deploy operation maintains flat material with accurate positioning.

FEATURES

- ANA Italian Motor
- Exclusive 4 layer Matte white material
- 12 volt trigger operation
- Full remote control operation
- Carson control module.
- IR extension port
- Manual and remote operation.
- Deploy length settings
- Available in Polished White or Piano Black.
- 2 year Australian warranty.

Cellio Pro

POWERED PROJECTION SCREEN

The Cellio-Pro is built using a Larger ANA Italian Motor. This larger Motor ensures approximately 60 percent less material wind, attributing to an extremely flat screen surface and consistent material integrity. The Cellio-Pro is designed to recreate images with superb clarity, resulting from a perfectly flat canvas.

FEATURES

- Large ANA Italian motor, low wind.
- Balanced Weighted Tension Bar.
- Exclusive Preference Matte White material.
- 12 volt trigger operation.
- Full remote control operation.
- Carson control module
- IR extension port.
- Manual and remote operation.
- Deploy length settings.
- Available in Polished white or Piano black.
- 2 year Australian warranty.

Distinctive

Projection Image reproduction is an intricate specialized craft. Correct material texture will create emotional excitement and heightened watching pleasure. Carson Screen's attention to craftsmanship and technology is an essential component in creating balanced colour replication and clarity distinctiveness, while seamlessly integrating into your personal viewing environment. In 2009 Carson Screens introduced the largest width framed projection screen in the world. The Selina-Pro offers accurate tension, with prominent designer presence.

The Preference

TAB TENSION SCREEN

The Preference is Carson's Flagship Screen. A completely flat surface is guaranteed. The unique side tensioning system maintains material integrity from over 20 integrated target points. Tension can be controlled to accommodate environmental changes. The Preference will maintain the flat surface of a fixed frame in a powered screen design. Sharp modern lines and quality craftsmanship make the Preference a connoisseurs choice. Built standard with Carson's control module and Preference matte white 4 layer material.

FEATURES

- Controllable Tab Tension System
- Large ANA Italian motor
- Preference 4 layer Matte white material
- 12 volt trigger operation
- Full remote control operation
- Carson control module .
- IR extension port
- Manual and remote operation.
- Deploy length settings
- Available in Polished white or black.
- 2 year Australian warranty

Carson Cinemascope Anamorphic Screen

Most movies are now produced in a Cinemascope format known as 2.35:1 aspect ratio. A Carson Cinemascope screen places the viewer into the movie by opening up their peripheral vision. Cinemascope formats are available in selected models from 92 inches in size to a massive 200 inches. The Preference Screen is Carson's flagship Cinemascope model, offering perfect tension control over this wide cinema aspect ratio.

Carson Preference

TAB TENSION SCREEN

Carson Screen's success stems from a passion to create quality products through research and development. It is now possible to enjoy cinematic films in the luxury of private theaters reproducing superior imaging. So now more than ever, screen material surfaces and solid build construction are as important as the projector itself. Quality is a distinctive element and has been our goal from day one. Carson Screens have now redefined Powered and Fixed Projection Screens for home cinema and custom install professionals.

Phoenix

POWERED FLOOR SCREEN

The Carson Phoenix is Australia's first powered floor screen in a widescreen format. Designed for areas where space and installation are limited. The Phoenix can be permanently installed in furniture, or placed at the edge of a wall, hidden until deployed. Built with Carson's unique scissor arm design, the Phoenix maintains a flat image with convenience in any situation.

FEATURES

- Available in 16:9 and 4:3 format
- Remote or manual operation.
- Portable or permanent applications
- Piano white or black finish.
- No installation required
- Quiet operation
- Controlled tension
- Floor Powered Screen

The Altitude

SELF LOWERING SCREEN

The Altitude is the professional solution for high ceiling installations, ranging from 5m to 9m in height. The innovative operation allows the entire screen body to be lowered vertically to the desired height. This is achieved by using a cable system to lower the screen casing. Once the screen casing is lowered to the desired height, the material can then be deployed from the casing.

The Carson Altitude allows the user to have flexibility in installation, while maintaining a perfect viewing angle. Suitable for churches, hotels, conference rooms, nightclubs, or venues with high ceilings. If installation height is a challenge, the Altitude will provide the answer.

The Altitude's motor utilizes a tubular self winding cable. The cable system, and the Screen's motor operate independently within the one casing. The system is neatly hidden within the body. The modern construction of the Altitude provides a professional setup that is easy and secure.

FEATURES

- Suitable for 5m to 9m high ceilings.
- Adjustable Electronic positioning for casing
- Adjustable setting for material drop.
- Remote and manual operation
- Carson Matte white 4 layer material
- Heavy duty professional motor
- 2 years warranty

Aspire

PULL DOWN SCREEN

The Aspire is stylish, modern, strong, and lightweight. To operate, simply pull the screen material down to the required height and hold for 3 seconds.

The screen will lock without any extra pulling. This allows for perfect height adjustment with every use.

The Aspire is built using Carson Screen's unique speed reduction and self locking system. This speed reduction system ensures upon releasing the handle, a slow controlled deploy into the housing. The Aspire comes standard with the Carson Screen Matte white material

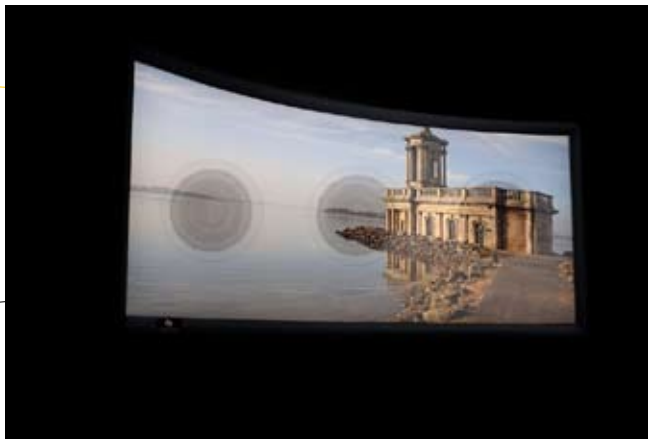

Installation is easy using Carson's innovative ceiling and wall mount. Quality build and operation ensures professional presentations every time. Once installed, the bracket allows the screen to be moved left and right for perfect alignment. Available in piano white, or piano black. Covered by Carson's 2 year warranty

Selina Curved

CURVED CINEMASCOPE FIXED FRAME

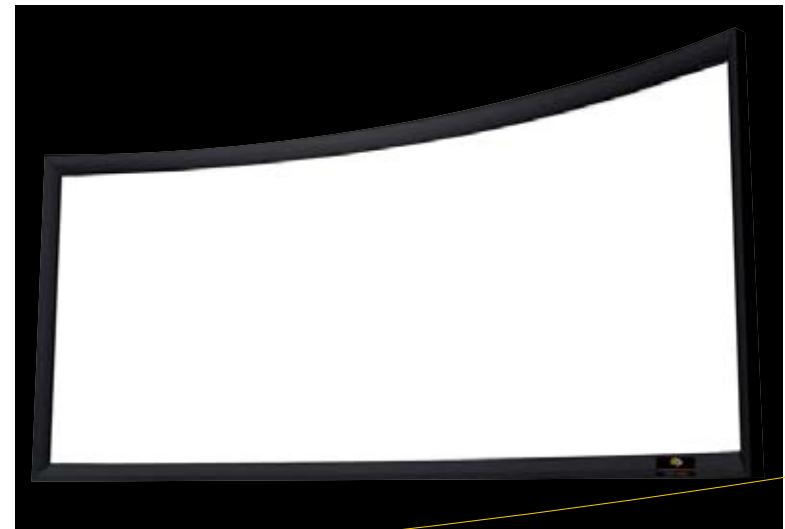

Normal Projection Screens operate on a flat surface, however the human eye bears an oval shape and differs in focal length. With the Selina Curved Fixed-Frame screen, the bend conforms more accurately to the natural viewing focal length and thus creates an image for the viewer that is a near accurate match to the image represented.

The lens of a projector is designed to be spherical in shape. The larger the projector's screen, the larger the spherical distortion will be. By changing the screen's horizontal arc, the distance between each point on the Curved Permanent Fixed-Frame in relation to the projector is near equivalent. The blurred distortion that sometimes occurs at the wider edges of the image can be eliminated, making the large image uniform and perfectly focused. The Selina Curved can be built using Acoustic screen material.

FEATURES

- Prominent Size frame
- Unique 30 point Tension anchors.
- Black velour covered frame surface
- Available in matte white, Preference matte white, and Carson Acoustic screen material.
- Carson 3 years warranty
