Panorama 2

Widescreen for your ears Panorama 2 is a discreet, high-performance soundbar that dramatically boosts the audio performance of your television viewing, without the need to fill your living room with speakers. Panorama 2 comes from Bowers & Wilkins, an audio company with close to five decades of experience creating the kind of loudspeakers that world-leading recording studios such as Abbey Road depend upon.

Listen and you'll see.

Reasons to buy Panorama 2

Acoustics

Enveloping sound Panorama 2's bespoke drive units are designed to disperse sound to as wide a listening area as possible. This large audio "sweet spot" means the whole family can immerse themselves in pristine surround sound, dramatically boosting the performance of your TV.

Advanced engineering Panorama 2 features specially designed tweeters, midrange and low frequency drive units. This leads to amazing bass, and seamless integration. Your TV and movie viewing will sound better than you ever thought that they could.

Benefits

Plug and play Using Panorama 2 is as simple as plugging it into your television, Blu-ray player or games console using its 3 HDMI inputs and 1 HDMI output. It acts as the hub of your home entertainment system, features intuitive on-screen menus, and lets you use your own remote control.

Complete control Panorama 2 features an elegant proximity-sensitive display on its front panel. Leave it alone and it fades to black. But wave your hand over the display and you can instantly control Panorama 2's menus directly. Meaning you are always in control.
