5CH INTEGRATED NETWORK RECEIVER FEATURING AIRPLAY AND SPOTIFY

Connect the AVR-X1000 5.1-channel HD-Audio receiver to a TV and Blu-ray disc player supporting 3D video and you'll be able to experience an exciting 3D theatre with powerful surround sound. High sound quality is achieved by using discrete and specially sound tuned power amplifier stages. Audysseys highly praised MultEQ-XT circuit helps to eliminate room errors very efficiently while preserving the signal quality. Then connect it to your network and enjoy audio streaming via AirPlay, listen to Internet radio or your Spotify playlists and play your entire music library from

your PC or NAS because this unit is DLNA1.5 certified. Android devices are compatible to DLNA as well. This receiver also has a USB port where you can connect an iPod, iPhone, iPad or USB memory device and directly play digital music tracks from those devices in the superior sound quality that Denon is well known for. Setup is extremely easy as the AVR-X1000s new Setup Assistant guides you through the procedures for setting the language, speakers connections and other topics. All will be shown on your TV screen.

Fully discrete, identical quality and power for all 5 channels (145w per channel)

To faithfully reproduce the original surround sound, each of the AVR-X1000's 5 channels is equipped with the same power amp of equal power. Since these power amps also use discrete circuits configured with parts strictly selected for their contribution to high sound quality, rather than with low-cost integrated circuits (ICs), the surround sound playback is of impeccably high quality. The "simple and straight" design concept has been thoroughly implemented in the signal paths to contribute to immaculately clean audio playback. Signal paths are as short as possible to keep signal degradation in the audio circuitry to an absolute minimum.

Network, AirPlay, Spotify and Denon Remote App

When connected to a network, the AVR-X1000 can play audio files and still images such as photographs that are stored on your computer. You can also listen to internet radio and a host of other online music sources that use network technology.

NEW AND UPGRADED FEATURES

- The plenty of network capabilities and functions allow you to enrich your entertainment world including:
 - AirPlay
 - DLNA 1.5 certified
 - Windows 8/RT compatible
 - Internet radio
 - Spotify¹ and Last.fm¹ Online service support
 - Photo streaming
 - flickr
 - FLAC-HD (192kHz / 24bit), High-resolution audio file playback
 - Gapless Playback for WAV and FLAC
- Horizontal color-coded layout of speaker terminals for easy connection
- Improved Setup Assistant, providing easy-to-follow setup instructions with Graphical User Interface (Hybrid GUI, 9-languages)
- Optimised Bass redirection, for powerful bass performance in configurations without subwoofer
- Upgraded front panel design with two knobs (source, volume)
- Label sheet for marking Speaker Wires & HDMI Cables

-----	--------------	---------------

The AVR-X1000 also supports AirPlay that lets you stream your music library from an iPhone, iPad, iPod touch, or iTunes. You can directly access all the playlists and music from your Spotify Premium account by simply entering your account data into your AVR.

The Denon Remote App available for free on iTunes or Google Plus App store transfers your smartphone or tablet in a nice remote control supporting the key features of the AVR. But it doesn't stop here as you can control the network audio streaming from your PC and internet radio function supported by cover art. That's ease of use, that's fun.

5 x HDMI in (1 on front panel) / 1 x HDMI out

The AVR-X1000 provides a generous supply of 5 HDMI inputs, including 1 on the front. These inputs can be used to connect mobile devices such as a camcorder or tablet, allowing you to immediately enjoy videos, photos, and music. All these support 3D, ARC and CEC.

STATE-OF-THE-ART DENON SOLUTIONS FOR MAXIMISING CONTENT QUALITY

- Fully discrete, identical quality and power for all channels (5 channels, 145 watts per channel)
- Stable power supply for high-quality sound and picture playback
- Audyssey MultEQ XT, automatically sets the speakers to suit the room's listening environment and the speakers' characteristics
- Audyssey DynamicEQ, improves surround effects during low volume levels
- Dolby TrueHD, dts-HD Master Audio
- Minimum Signal Path for clear audio and video signal
- High-performance 192kHz/24-bit D/A converters for all channels
- Digitally transmitted Play function for iPod and iPhone (via USB) for best sound quality
- Denon's proprietary Compressed Audio Restorer, to restore sound quality from compressed music sources

Easy operation with Setup Assistant, Hybrid Graphical User Interface (Hybrid GUI), Quick Select buttons and color coded speaker terminals

The new Setup Assistant in 9 languages (English, French, German, Spanish, Italian, Dutch, Swedish, Polish, Russian) will guide you through the full setup of the unit including speaker wiring, Audyssey speaker calibration, source selection and network setup all supported by pictures showing what to do and where to find the right connector. The Hybrid GUI will let you keep the full overview even while watching a movie. Just check your settings or get the volume and surround mode indication overlaid on the film you watch. Don't miss any scene. With the Quick Select buttons, you can preset volume levels for the sources you most frequently use. Then when you use one of the buttons to select a source, it is ready to play using the same settings each time. The horizontal colour coded layout of the speaker terminals makes it easy to connect all the speakers to the AVR.

EASE-OF-USE

- Improved Setup Assistant and Hybrid GUI
- Audyssey Dynamic Volume[®], for real-time volume adjustment
- 4+1 (front) HDMI inputs with 3D, CEC and ARC support
- Convenient HDMI port on the front for connecting a camcorder or other device
- Comes with simple, easy-to-use remote control handset
- Denon Remote App for iOS and Android
- Front display with large, easy-to-read characters
- Quick Select Button for direct access to favourite sources
- Sleep Timer, set up to 120 minutes in 10-minute increments
- Audio level memory, capable of correcting different signal levels for each input device
- Standby HDMI Pass through
- Auto Standby and low power consumption at stand-by 0.1 W

Technical information	
Number of power amps	5 (Front L/R, Center, Surround L/R)
Power output	145 watts per channel (6 ohms, 1 kHz, THD 1%, 1ch driven)
	120 watts per channel (6 ohms, 1 kHz, THD 0.7%, 2ch driven)
	80 watts per channel (8 ohms, 20Hz - 20 kHz, THD 0.08%, 2ch driven)
Preamplifier section	Input sensitivity/impedance 200 mV / 47 kohms
	Frequency response 10 Hz - 100 kHz — +1, -3 dB (DIRECT mode)
	S/N Ratio 98 dB (IHF-A weighted, DIRECT mode)
FM section	Tuning frequency range 87.5 - 108 MHz
General	Power supply AC 230 V, 50 Hz
	Power consumption 390 W (Standby 0.1 W, CEC standby 0.5 W)
	Dimensions (W x H x D) 434 x 151 x 330 mm
	Weight 8.2 kg

Ports		
IN	HDMI (front 1)	x 5
	Composite (video)	x 2
	Analogue Audio	x 2
	Digital Optical	x 2
OUT	HDMI Monitor	x 1
	Composite Monitor	x 1
	Audio Preout (SW)	0.1 ch
	Phones	x 1
OTHER	Ethernet	x 1
	USB Port	x 1
	Microphone Port	x 1
	FM Tuner Antenna	x 1
