Expansive driver array

Enjoy your music when you want it

Voice control

YOUR BENEFITS

Experience immersive home theatre sound from your favourite movies and TV programs

Included subwoofer wirelessly connects to the soundbar for deep, impactful bass

Supports Dolby Digital, Dolby Digital Plus and DTS decoding surround sound formats

With a powerful 400 MHz 32-bit floating point DSP engine — the same processor found in premium Denon AV receivers, enjoy enhanced sound quality

Most convenient setup and operation with your TV set or projector

Dual soft dome tweeters with neodymium magnets deliver extended treble response with wide dispersion

Stream popular music services via AirPlay 2, *Bluetooth* and HEOS Built-in technology

Use your voice to control music and other soundbar functions with the HEOS Home Entertainment Skill and your Amazon Alexa device

DENON 100+ YEARS “LEGACY OF FIRSTS” IN AUDIO TECHNOLOGY

www.denon.com.au

Powerful Home Theatre Sound

Two bi-amplified mid-woofers, two tweeters, and advanced DSP processing paired with a powerful wireless subwoofer with two drivers add dimension and depth to your favourite movies and TV shows.

HDMI In/Out with Audio Return Channel (ARC)

HDMI input and output features Audio Return Channel (ARC) for single cable connection from the soundbar to your TV. Supports 4K with HDCP 2.2, Dolby Vision and HDR10.

Works with Most TV's and TV Remotes

Never worry if the DHT-S516H will work with your TV or not; the included HDMI and Optical cabling makes certain your soundbar is compatible with any source. The included IR blaster and HEOS IR learning function allows for control with your TV remote if the soundbar is blocking its IR receiver (sensor).

Stream Music via AirPlay 2, Bluetooth and HEOS Built-in

Stream music effortlessly with Apple AirPlay 2 compatibility and built-in Bluetooth technology. And because it works as a HEOS speaker, you can wirelessly stream music in one room or with other HEOS products, controlling it all with the free HEOS app.

Amazon Alexa Voice Control

With Amazon Alexa support you can control music from your favourite music streaming services — Spotify, Amazon Music and much more — with your voice using the free HEOS Home Entertainment Skill and your Amazon Alexa device (ex. Echo, Dot). To start streaming with Alexa voice commands, simply open the Alexa app and select "Skills." Add HEOS Home Entertainment to enable. Then, go to Smart Home in the Alexa app menu and choose Devices and Discover. Or say "Alexa, discover my devices."

HEOS Multi-Room Streaming

HEOS Built-in technology lets you enjoy your favourite music in any room of your home for a complete wireless, whole-home audio experience. Play the same song in every room, or select a different song for each connected room — the choice is yours. Enjoy music from Spotify, TuneIn Internet radio, SoundCloud, TIDAL, Amazon Music, Deezer, or your local music file libraries. With additional devices featuring HEOS Built-in, like speakers, mini systems or HiFi components, you can easily build up a multiroom system in your whole house.

Supports Popular Surround Sound Formats

Supports Dolby Digital, Dolby Digital Plus and DTS decoding for an immersive surround sound experience.

High-Resolution Audio Playback

Enjoy the ultimate music listening experience with high-resolution playback, whether you stream over your network or plug in a USB to play previously saved tracks. Supports WMA (up to and including 192kbps AAC), MP3 (up to and including 320kbps), WAV, ALAC and FLAC (up to and including 24-bit/192kHz), and DSD: 2.8MHz or 5.6MHz.

Movie, Music and Night Modes

The DHT-S516H features pre-set EQ modes optimized for movie and music listening. Select the Movie mode to punch up the bass of an action scene or to make dialogue sound clearer. Choose the Music mode for a wider soundstage and even dispersion. Or, switch to Night mode for lowered bass and clear dialogue when it's time to quiet things down.

Wall-Mountable

Easily mount the soundbar to a shelf or wall — the choice is yours.
