DIGITAL CINEMA**

# JBL STUDIO 570

Dual 5-1/4" Floorstanding Loudspeaker with High-Frequency Compression Driver in a Horn and Classic JBL® Bass

Large vertical arrays of constant-directivity horns hidden behind the screen of your favorite movie theater or high overhead at major concert events have long been a defining characteristic of JBL® Professional loudspeakers. It's how they deliver the massive amounts of highly accurate sound and live music experience that large audiences expect. The most advanced JBL residential loudspeakers, including Everest DD66000, K2 and Project Array, also feature high-frequency horns, coupling them with powerful low-frequency drivers to achieve the highest levels of dynamic realism and dimensional accuracy. Now JBL Studio 5 Series speakers, designed by renowned JBL chief engineer Greg Timbers, continue this performance-proven tradition. The JBL Studio 570 floorstanding loudspeaker combines a 1-inch (25mm) HF compression driver and Bi-Radial® horn with dual 5-1/4-inch (130mm) cast-frame Symmetrical Field Geometry (SFG) woofers to deliver extraordinarily lifelike performance. Ideal for both music and movie systems, the Studio 570 system is powerful, accurate and styled to make a dramatic design statement in any listening environment.

## TECHNICAL SPECIFICATIONS

Low-frequency transducers:

High-frequency transducer:

Recommended amplifier power:

Frequency response:

Nominal impedance:

Sensitivity (2.83V/1m):

Crossover frequencies:

# JBL STUDIO 570

Dual 5-1/4" Floorstanding Loudspeaker with High-Frequency Compression Driver in a Horn and Classic JBL® Bass

## HIGHLIGHTS

### Dual 5-1/4" (130mm) Low-Frequency Transducers

- Stiff, lightweight ribbed PolyPlas cones with rubber surrounds
- 1-1/2"-diameter woofer voice coils
- Heavy-duty magnet assemblies with Symmetrical Field Geometry (SFG) technology
- Rigid, non-resonant cast aluminum frames
- Clean, powerful bass response at all listening levels

### 1" (25mm) High-Frequency Compression Driver

- One-piece Teonex® diaphragm/surround with 1" voice coil
- Significantly lower distortion and greater dynamic range than conventional midrange and HF drivers

### Glass-filled ABS Bi-Radial High-Frequency Horn

- Controlled directivity at ear level of seated listeners minimizes unwanted HF interaction with walls and furniture
- Cleaner, more realistic HF sound over a wider listening area

### 3/4" (19mm) MDF Enclosure

- Rigid, heavily-braced design with non-parallel surfaces reduces unwanted resonances

### Low loss, 2-way crossover network

- Smooths transition between woofers and HF compression driver/horn
- Reduced distortion and coloration for improved sonic clarity

### Exclusive Design

- Dynamic, one-of-a-kind look

## KEY FEATURES

- Rear-facing bass port increases output and extends bass response
- Dual gold-plated binding posts with bi-wire capability increases connection options
- Available in black finish
