AVAILABLE AT
DIGITAL CINEMA

The IW 406 FG is equipped with a rotating, pivoting tweeter and **WaveGuide**. As with most in-wall speakers in the 400 and 600 Custom series, they are designed with special attention to freedom of placement. Due to Jamo's clever **SoundAngle** technology, the speaker can be mounted at a height of several meters, without compromising the sound quality.

Simply set the switch to -30 degrees and the sound will be optimised downwards, aiming at the listening position. If the speaker is installed at normal height, the switch is simply set to 0 degrees.
