Lightweight and comfortable over ear headphones for all-day use with best-in-class active noise canceling technology in a compact and organized FlightCase, designed to enhance life's journeys.

LEGENDARY SOUND + GREAT FIT

After 60+ years of making legendary loudspeakers, we built upon our bold audio heritage to revolutionize the headphone industry. Since 2007 we have been creating the most innovative headphones on the market. We are the performance and comfort winners. Period.

The same advanced acoustic engineering and industrial design from our legendary home theater speakers provide the performance, voice and design for all Klipsch headphones. They are engineered for pure performance and designed to be the best sounding, most comfortable earphones on Earth and the embodiment of legendary Klipsch sound.

DUAL MIC ACTIVE NOISE CANCELLATION

Best-in-class hybrid active noise cancelling that knows and automatically calibrates for flight, office or transit. Misfit calibration means long hair or glasses do not compromise the noise reduction.

FLIGHTCASE

From the outside in, one case to be your everything –passport, papers, cables, flash drives and headphones in one place. For the first time in a headphone, an embedded USB-C cable charges your headphones through the case. Elastic webbing and pockets hold your travel essentials while the superior folding design allows the headphones to fit discretely in the case.

40MM FREE-EDGE BIODYNAMIC DRIVERS

Driven by a pair of 40mm biodynamic drivers, the HP-1 provides superb dynamic range, bass resembling a real loudspeaker and decreased distortion. The free-edge rubber surrounds create a driver that stays solid and rigid, moving like a piston instead of rocking and tilting like typical headphone drivers, reducing tonal coloration and improving clarity.

BATTERY LIFE

The HP-1 provides up to 30 hours of battery life on a single charge giving you the freedom to take calls and listen all day long.

TRUE COMFORT™

The HP-1 over ear headphones are lightweight and feature ultra-plush memory foam earpads designed to fit around your ears for all day comfort.

TRANSPARENCY MODE

This mode is designed to allow sound from the outside world into your ears, so you know what's going on around you.

BLUETOOTH 5

Easily pair to your device for a quick, wireless connection. Using aptX HD and a Hi-Res mode using the included USB-C cable, the HP-1 is capable of 48k/24-bit wireless and lossless wired listening. The headphones can also be used with a traditional 3.5mm auxiliary cable (included) and in-flight (airline adapter included) without depending on a charged battery.

DIGITAL ASSISTANT READY

Instantly trigger your voice assistant with one press.

SPECIFICATIONS

STYLE	Over-Ear
DRIVER DESIGN	Free-Edge Bio Dynamic
DRIVER DIAMETER	40 mm
MIC/REMOTE	cVc 8.0 Dual-mic
FREQUENCY RESPONSE	5Hz - 45kHz
