WIRELESS HEADPHONE FOR ACTIVE LIFESTYLES

Klipsch R5 Wireless headphones are the perfect Bluetooth headphones for an active lifestyle. Our patented comfort ear tips and miniature drivers ensure the headphones stay in place comfortably for hours. Plus, the R5 Wireless is rated and tested at IPX4 and will resist sweat, moisture and rain.

FULL BASS, DYNAMIC DRIVER

Engineered from the ground up to deliver powerful performances from the smallest package, the R5's dynamic driver combines high output and full bass extension.

SO COMFORTABLE IT'S PATENTED

Klipsch in-ear monitors utilize patented contour ear tips that are anatomically designed to sit comfortably inside the ear canal. These soft oval silicon tips reduce ear fatigue and provide an amazing seal for excellent noise isolation and bass response. With your choice of patented oval ear tips, memory-foam tips or optional ear wings, the R5 Wireless headphones stay in your ears regardless of what you're doing.

CABLE MANAGEMENT FOR DUAL WEAR

The R5 Wireless headphones provides two options for wear – down and loose or tighten the cord for a secure, unobtrusive fit.

8 HOUR BATTERY LIFE & CLEAR VOICE CHAT

The R5 Wireless headphones use a single lithium ion battery to deliver over eight hours of listening to music and taking calls. The integrated cVc® microphone automatically enhances voice clarity and actively reduces environmental noise to ensure your calls are loud and clear.

ADVANCED THREE-BUTTON REMOTE

Offers full control of most smartphones, including Android and Apple devices, for seamless control of music and phone calls. Double tap the multifunction button and use your phone's voice assistant on the fly.

BLUETOOTH 4.2

With aptX and AAC high quality codecs, the signal is as good as wired with no delay during video playback. The R5 Wireless headphones also support multi-point pairing, so you can pair two devices at once.

COMPLY™ COMFORT TS-100 TIPS INCLUDED

For a true custom fit and unparalleled security in your ear, a pair of Comply Ts-100 Comfort foam tips are included. The dramatic increase in ear retention ensures marathon-readiness.
