

X12 Neckband

**AVAILABLE AT
DIGITAL CINEMA**

FORGET THAT YOU'RE WEARING HEADPHONES

We've paired our smallest, lightest, best sounding, and most comfortable X12 acoustic modules with the premium materials and craftsmanship of our Neckband for the best possible experience for listening on the go. Built from durable, authentic materials that will withstand the test of time. Protected by an electroplated black chrome steel exoskeleton and bound by genuine leather, Klipsch Neckband headphones combine superior form and function in one smooth package.

WORTHY OF A DAY'S WORK

Built with extended usage in mind, Klipsch Neckband headphones use a pair of large batteries to deliver over 18 hours of listening to music and taking calls. The integrated cVc® microphone automatically enhances voice clarity and actively reduces environmental noise to ensure your teleconferences are loud and clear. The built-in neck vibration feature will vibrate to notify you of incoming calls. The raised controls let you pick up calls, adjust volume, and track through songs without looking so you can keep your eyes on the prize. If the negotiations get hot, the Klipsch Neckband is IPX4 splash-proof and will continue to work in highly humid and wet conditions.

DON'T MISS A CALL

With a vibrator built into the left control pod, you can stop worrying about missing that important call if your phone is out of reach. The Neckband will vibrate against your collar bone to notify you of an incoming call. Pick the call up directly from the right control pod and take your call using the built-in cVc® microphone.

AUDIOPHILE BALANCED ARMATURE

Utilizing a single custom KG-926 balanced armature placed inside of a milled aluminum housing, X12i achieves full range response from a tiny form factor. Ported and vented, the balanced armature driver delivers classic tube amplifier sound and unmatched bass performance. With a warm and lush soundstage, the KG-926 delivers dynamics only rivaled by multi-armature counterparts.

SO COMFORTABLE IT'S PATENTED

Klipsch in-ear monitors utilize patented contour ear tips that are anatomically designed to accurately sit inside the ear canal. These soft oval silicon tips reduce ear fatigue as well as provide an amazing seal for excellent noise isolation and bass response. They fit better, they feel better, and only Klipsch has them!

CUSTOM FIT WITH COMPLY™ COMFORT TIPS

Bundled with a pair of Comply™ Ts-100 Comfort Tips, the X12 ear modules will feel even more personalized. With body-heat activated memory foam, these tips provide a more secure fit for those people who choose to arrive at the airport with no time to spare.

ADVANCED THREE-BUTTON REMOTE + CLEAR VOICE MIC

Offers full control of most smartphone models including Android and Apple devices, allowing for seamless control of music and phone calls. Equipped with cVc®, X12 Neckband Bluetooth automatically enhances voice clarity and actively reduces environmental noise to ensure you sound loud and clear.
