Bookshelf Speakers

Built to fit virtually any space, PSB bookshelf speakers are engineered in Canada with more than 40 years of advanced acoustic research and design. From the original Beta and legendary Alpha to PSB's beautifully designed Imagine Series, every bookshelf speaker is meticulously tuned and tested at Canada's national research facilities to deliver the most accurate acoustics under the most demanding of listening conditions.

Behind the Alpha Series

First designed and manufactured in a small Canadian town in 1991, the Alpha Series started with the simple idea of creating affordable speakers that were focused purely on performance. With passion and dedication in pursuit of a natural sounding speaker, and by leveraging decades of research conducted at the Canadian National Research Council by PSB's founder, Paul Barton, the Alphas quickly rose to be one of the world's most iconic speakers and are still the reference benchmark for entry-level hi-fi speakers today.

The newly designed Alphas look to continue their legacy by staying true to the original concept from the '70s and combining it with today's latest cutting-edge technologies. Powerful and smooth, the all-new Alpha Series has been rebuilt with enhanced custom drivers and a new crossover design that works perfectly together to deliver natural, detailed sound with precision and less distortion. In a home theatre or stereo setup, the new Alphas outperform the originals in every measurement and will bring your music and movies to life.

- 3/4" Black anodized aluminium dome tweeter with front waveguide
- 5.25" Textured polypropylene woofer with rubber surround
- Bass reflex cabinet design with a rear-firing port
- Acoustically-transparent detachable magnetic grilles
- Five-way gold-plated binding post speaker terminals
- High-quality woodgrain vinyl finish
- Available in Black Ash or Walnut

Alpha P5 Monitor

Breakthrough design for incredible studio-quality sound. A timeless two-way bookshelf speaker with a 5.25" woofer, the P5 allows you to transform your system with pristine sound. Featuring a refined bass reflex cabinet and a port tube first developed for the original Alpha speaker, the Alpha P5 creates a pure and natural soundstage by utilizing the latest and most advanced driver technologies and magnet structures. The P5 was perfectly tuned inside the anechoic chamber of Canada's acoustic research facilities to produce a perfectly flat frequency response that lets you enjoy the subtleties of your music and movies with lifelike detail.

Anodized aluminium tweeter with waveguide

The P5 uses a 0.75" black anodized aluminium dome tweeter to extend the high-frequency response further than any Alpha ever before while lowering distortion to deliver layered sound with detail and clarity. Unlike lesser designs at this price, all of the new Alpha Series tweeters employ ferrofluid cooling to prevent dynamic compression and a neodymium magnet for high sensitivity. The tweeter's front waveguide and its unique placement below the woofer work together to smooth the response at the crossover and perfect on and off-axis performance.

Perfectly matched bass

When paired with the Alpha Series' newly designed tweeter, the P5's custom 5.25" woofer provides remarkable low-frequency response and the highest speaker efficiency in its class. The woofer is constructed from a special textured polypropylene compound that minimizes cone breakup and lowers distortion at full excursion. It's also supported with dual layer voice coils and a bass reflex design that uses the rear-firing port tube to control the bass response down to room-shaking levels.

Smooth sound reproduction

The Alpha Series' new crossover exceeds speaker standards with a special custom design that does more than direct low and high frequencies to the individual drivers--it delivers the tightest control and the flattest frequency response. An unusually complex Linkwitz-Riley acoustic filter has also been incorporated into the crossover design to lower distortion and create a seamless soundscape in any type of two-channel setup or surround sound system.

Beautiful finishing touches

A unique combination of wall thickness and bracing controls resonances and provides a perfect platform for the P5's driver components, while its internal damping material is from PSB's flagship lines and has been precisely positioned for optimal effectiveness. Finished with a high-quality woodgrain vinyl and magnetically attached grilles that are acoustically transparent, the P5 is perfectly designed to seamlessly disappear into any décor and provide rich, detailed sound.

SPECIFICATIONS

FREQUENCY RESPONSE (Anechoic Chamber)	
On Axis @ 0° ± 3dB	55-21,000Hz
On Axis @ 0°±1 1/2dB	65-20,000Hz
Off Axis @ 30°±3dB	65-10,000Hz
LF Cutoff -10dB	37Hz
SENSITIVITY (1 W (2.83 V) @ 1M, IEC-Filtered pink noise, C-weighted)	
Anechoic Chamber	87dB
Typical Listening Room	89dB
IMPEDANCE	
Nominal	8 Ohms
Minimum	4 Ohms
INPUT POWER (RMS, Clipping < 10% Time)	
Recommended Program	10-90 Watts
	60 Watts
ACOUSTIC DESIGN	
Tweeter (Nominal)	3/4" (19mm) Black Anodized Aluminium Dome with Ferrofluid and Neodymium Magnet
Woofer (Nominal)	5 1/4" (133mm) Textured Polypropylene Cone with Rubber Surround
Crossover	2.500Hz, L4
Design Type	Tuned Port Bass Reflex 2" (49mm) Rear Port
CONSTRUCTION	
Cabinet Sleeve	1/2" (12mm) MDF
Baffle Front	1" (25.4mm) MDF
Baffle Rear	1/2" (12mm) MDF
Grille Face	Black Steel Micro Perf with Magnetic Attachment
Frame	
Threaded Insert	1/4" - 20 Threaded Insert
SIZE (W x H x D) (Gross Dimensions)	
Net	6 3/4" x 11 3/8" x 9 1/2" * (170 x 290 x 240mm)
WEIGHT	
Net	10.15lb (4.6kg)/each
Shipping	22.8lb (10.4kg)/pr
FINISH	
	Black Ash or Walnut in Vinyl Clad
FEATURES	
	5-way Gold-plated Binding Posts Clear Bumpers Rear Facing Port
