FM/DAB+ TUNER

T11

DAB+ tuning

RDS (Radio Data System) capability for FM broadcasts

Includes remote control

Rotel has been producing quality tuners since the 1960s. One of the latest additions to this long-established line-up is the T11 FM/DAB+ tuner. It provides a wealth of listening options with easy access to classic analogue FM stations as well as newer DAB+ (Digital Audio Broadcasting) services. Like the

T14, T11 features the ability to easily store and recall up to 30 presets each for FM or DAB+ stations. A further useful feature common to all 14 Series products is the ability to dim the display panel and power LED to provide a comfortable visual reference in all lighting environments.

Rotel tuners provide a wealth of high quality listening choices. See more at
